IT, System Integration, Internet

- Software Development

Engineering Teamlead

As an Engineering Team Lead at GoCrowd, I developed and released a web application, responsible for architecture, development, business development, team management, and project timelines. I worked closely with all departments to create a high-quality product. My tech stack included Ruby on Rails, React (Typescript), and AWS.

July 2019 — July

Rocket System

Fullstack web-developer

At Rocket System, I developed and implemented a client dashboard, integrated a WebRTC system, and rewrote open-source product logic to meet project requirements. My tech stack included PHP (Laravel), Ruby on Rails, VueJS, and NodeJS.

October 2018 —
February 2019
5 months

Bivelop Studio

Ruby on Rails developer

At Bivelop Studio, I developed the client-side of a cryptocurrency management application and integrated payment systems.

June 2018 —
August 2018
3 months

MethodPro

IT, System Integration, Internet
• Software Development

Back-end Developer

As a summer intern at MethodPro, I developed the back-end (Ruby on Rails) for a website with a ranking system for universities in Kazakhstan. I also created an Attendance Telegram bot for students using QR code (Python).

About me

I love solving business problems using not only my programming skills but also analytical skills beyond the technical aspects. I'm eager to work in a strong team where I can unleash my potential.

I'm also interested in esports (Dota), primarily for the teamwork and synergy demonstrated by players. I have played in amateur teams and have always shown leadership qualities by taking the initiative in difficult situations. This has helped me become highly resilient and take initiative and responsibility in life.
